

***Princess Bug*** is the oldest in the barn at 27years old, but don't let that fool you. Even though her Welsh Pony size is smaller than some of the ones here, her slightest move makes everyone stand to attention in her field. She has had a long professional career as a Pony Club Pony and is a mom to three. However, as she has gotten older she has developed asthma and COPD, which is controlled by medicine twice a day. Her physical condition along with her spirit, provides us with the opportunity to see her intuitiveness to those who are hurting, especially women.
